

A Different Twist on Weather from a Real Weather Guy!

How the weather can twist! Joe will discuss storm prediction and NWS weather products. He'll talk about how forecasters figure out how that twister may twist, and ways to access that information online. We will learn about the NWS aviation program, organizational structure of the NWS, and weather products for the Twin Cities area. Live website demos will compliment our discussion.

Directions: This seminar will be located in the Modern Avionics Hanger located behind shop.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
